

General Civil / Site Development

General civil and site development services include assistance with planning and layout of proposed developments. THA has worked with clients to prepare development plans for site grading / landscaping, building and feature placement, and drainage for submittal to planning authorities as necessary for permitting. Timely and thorough completion of work is critical to the success of a project.

Project: Thompson-Berry Park Parking Expansion
Client: City of Owensboro / GRASS Soccer Club

Permits

Tony Huff & Associates offers services to clients to assist with permit issues ranging from building permits to storm water discharge, erosion control, or flood plain encroachment permits as required by local, state, or federal agencies. THA has specific experience in dealing with Kentucky Division of Water to obtain permits for water and sewer projects as well as floodplain encroachment permits.

Pre-Qualifications

Tony Huff & Associates is pre-qualified with the Kentucky Transportation Cabinet to perform Culvert Design and Structure Design (spans under 500') services.

Drainage / Hydrology

Tony Huff & Associates has assisted clients with drainage issues ranging from ditch re-grade improvements to design of on-site retention of storm water discharge. THA has the tools and resources to assist clients in solving site drainage problems and floodplain management requirements.

Installation of Sewer Line and Lift Station
